[REDACTED] 1. As, since November 1953, 85-mm AT guns arrived from the USSR have been repeatedly observed at barracks installations in East Germany, the report confirms for the first time a transport of 85-mm AT guns to a troop unit. The shipment on 2 January 1954 apparently carried 76.2-mm guns of the 207th Mts Rifle Div to the ordnance depot of the Third Shock Army in conjunction with the exchange of 76.2-mm guns for 85-mm AT guns. The shipment on 5 January probably also belonged to the exchange movement and indicates that artillery pieces of the IV Arty Corps were turned in to the ordnance depot of the GOMG.
